

## Requirements

The Church Technical Community understands the value of Wi-Fi Network Access in our Churches and the requirement for Churches to provide a safe, secure and responsible service provision. This policy also provides a framework for safeguarding in regards to Wi-Fi Network and Internet Access.

## Church Wi-Fi Network Access Policy and Conditions

- Church Wi-Fi Network Access is protected by a Pre-Shared Key as a method of restricting access to Authorised Users Only.
- Where Church Internet Access is available via the Church Wi-Fi Network Access then Acceptance and agreement of the Church Internet Access Policy and Conditions are mandatory.
- The Wi-Fi Pre-Shared Key is managed as part of the Key Holders Policy and is treated in exactly the same as way a physical key is managed by the Church.
- All authorised users should agree to this policy and sign a key holder policy agreement prior to being granted access to the Wi-Fi Network Access Pre-Shared Key.
- Unauthorised circumvention of any security or protection provided is forbidden.
- The Church reserves the right to Monitor Connections at any time and without notice.
- The Church reserves the right to restrict access at any time.
- The Church reserves the right to update this policy at any time.

## Implementation Recommendations

The Church Technical Community recommends implementing the current best practise for Wi-Fi security and managing the Pre-Shared Key as part of the Key Holders policy.

The easiest and zero cost approach is to use the Wi-Fi Network access points' ability to implement a static Pre-Shared Key as a basic means of restricting access to authorised users. This implementation does not provide the ability to define any time limit on access.

The CTC also supports a dynamically automatically configured self-updating Pre-Shared Key, which provides the provision of time limited access. This implementation requires installing specific Wi-Fi Network Access Point equipment at additional cost.

This policy document should be prominently displayed and provided to authorised users as required.

## Wi-Fi Network Access Usage Agreement

By accepting the Pre-Shared Key (Password) and by using the Church-provided Wi-Fi Network, you are agreeing to the above Policy and Conditions.

Document	Status	Version	Revision	Dated
Church Wi-Fi Network Access	CTC Proposal	1.0	1a	04/09/16
UCL Wi-Fi Network Access	Adopted	1.0	1a	30/10/17
